

Final Cut Express

Homework 1

Goal: practice what we did in class. Try to rearrange clips, shorten them, lengthen them, roll...

Option 1:

Create a short 10-15 second visual collage of your life. It can be anything but should be composed of at least three separate clips that you put together. Export as .mov.

Do not spend too much time on getting your footage. I want you to practice using the tools in FCE.

Option 2

Use the 3 clips provided in the FishTurtle folder and create a short movie. You have to include all three clips and trim them. Try to cut out the parts where the camera shakes. Export as .mov.

Due Thursday, Sept 3.
